Periods of record: San Diego temperature: 1872, precipitation: 1850. Santa Ana temperature: 1916, precipitation: 1906. Riverside: 1924. Escondido: 1900. Big Bear Lake: 1960. Idyllwild: 1943. Palomar Mountain: 1938. Victorville: 1917. Palm Springs temperature: 1917, precipitation: 1906. Borrego Springs temperature: 1965, precipitation: 1942.

On this day in...

2004: Tornadoes hit both Yucca Valley and Phelan. Thunderstorms produced severe flash flooding that damaged homes in Spring Valley Lake (Victorville) and Hesperia. Vehicles were trapped in five feet of water. Water eight feet deep inundated a railroad causing major delays (a train backup extending to Cajon Pass).

2002: It was 112° in Victorville, the highest temperature on record for August. This also occurred on 8.6 and 8.7 of 1998.

1998: Strong thunderstorms developed each day in the valleys and the deserts starting on 8.12 and ending on this day. Flash flooding and very strong winds resulted in Apple Valley. A thunderstorm in Hemet produced a downburst with winds to 70 mph and 0.75 inch hail that damaged buildings, trees, and power lines. Golf ball size hail fell at Cajon Pass. 1.6 inches of rain fell in 30 minutes at Boulevard.

1994: The low temperature was 77° in Riverside, the highest minimum temperature on record.

1992: A whopping 6.12 inches of rain fell in Palomar Mountain, the greatest daily amount on record for August.

1987: A very unseasonable storm from Alaska brought light rainfall to the area: 0.01 inch at San Diego, 0.07 inch at SDSU and Chula Vista, and 0.05 inch at Montgomery Field and Brown Field.
